

Press Release

Aboundi Inc. now expands its 'Electric Connect™' line of commercial quality packaged Ethernet over Power Line installation solution package for as low count as only two termination devices from its popular four, eight and twelve packaged Solutions

Innovative solution packages eases System Integrators (SI) and Value Added Resellers (VAR) networking field installation chores by utilizing the AC power line for broadband access to the Small and Medium sized Businesses (SMBs)

Nashua, NH – October 1, 2007 – Aboundi Inc. today announced an addition of the AEC1000-002 to its popular AEC1000-004, AEC1000-008 and AEC1000-012 series of 'Electric Connect™' packages that offers a complete solution for instant broadband access-ability to the commercial and business users by deploying the Ethernet data over the every day AC power lines within the premises.

Aboundi has introduced the 'Electric Connect™' series infrastructure packaged solution since Q4 in 2006 which allows the ease of broadband access installation through the common AC power line to any networking device which has the RJ45 10/100 Mbps Ethernet ports such as personal computers and other peripheral devices such as POS, IP cameras, monitors, serial control servers and etc.

The 'Electric Connect™' solution became an instant success within the POS applications market as it brought a very cost effective networking applications deployment solution just right for the job. It can very easily be reallocated without the need to rewire "home run" Ethernet drops which customarily cost from \$200 to \$500 per connected port. The package is designed specifically for the System Integrators (SI) and Value Added Resellers (VARs) for networking deployment projects to the Small and Medium sized Businesses (SMBs) such as restaurants, service stations, family run retail businesses and etc.

"We listen to our customers' feedback and are very pleased to bring forth the addition of this smaller packaged solution to our existing Electric Connect™ series of products. It shows our commitment and support to our customer's requests", stated Hong Yu, President and CEO of Aboundi Inc.

"Aboundi's innovative Electric Connect solution packed all the necessary components for a quick deployment of broadband networking applications over the AC power line within a premise" said Bob Nethery, General Manager of PC4, a Point of Service (POS) market distribution partner of Aboundi Inc. "This pre-packaged networking in a box allows our members the ability to easily deploy a networking application with great cost effectiveness."

The AEC1000 series packages come with one AGR2000 Broadband ConnectRouter™ that is optimized to operate with various number of APL1000 PowerLine Ethernet NetBridge™ for various number of required connectivity applications. The commercial

quality AEC1000-002 series is listed at \$399.95, and the AEC1000-004, AEC1000-008 and AEC1000-012 are listed at \$699.95, \$1,199.95 and \$1,699.95 respectively.

About PC4

PC4 is owned by the Retail Solutions Providers Association (RSPA) and sells to RSPA members and non-members. Membership in the Retail Solutions Providers Association (RSPA) provides dealers with a long list of benefits including; purchase discounts or rebates, networking opportunities, monthly news magazine, reduced convention attendance fees, private-labeled paper program, low-cost insurance, reduced cost voice, data and internet telecommunications, reduced-cost utility bills, legal assistance hotline, and more. <http://www.pc4online.com/>
